Drum Chipper MODEL VHI

Superior Engineering
Superior Performance

**INDUSTRY-BEST
WARRANTY**

The Drum Chipper, model VHI, will withstand years of heavy use, delivering a consistent, reliable product throughout its life. It's the right chipper for handling voluminous materials.

Features

- Chip screens ensure an even, consistent chip
- Unique control system monitors the load on the drum and changes the feed rate accordingly
- If a crash occurs, the knives are pushed back into the drum, allowing obstructions to clear
- Drum is attached to the driveshaft by expanding ring—a much stronger method than keyways
- Cover opens hydraulically for quick knife changes
- Segmented lower rollers allow for easier maintenance and replacement
- Optional hydraulic disc brake available to slow drum for knife changes or emergency stops

Versatility

- Can be used for whole logs, pulp wood, veneer, cores, slabs, scraps, etc. and for many other materials
- Available from 50 to 2,000hp with output of 14 to 200 tons/hour
- Horizontal or top feed, rear or bottom discharge
- Can easily incorporate metal detectors without fiberglass sections
- Chip size variable
