SMART Conveyors™ provide top performance for handling many materials. They're highly refined, modular, and allow wide customization in shapes, sizes, and materials, including stainless steel.

# Features

- Perfect for highly corrosive applications: high temperature, high acidity, and high moisture (pellets, wet cake, ash, etc.)
- Steep inclines — up to 90°!
- Dust-tight design
- Three conveyor series available with variable-sized walls and panels and widths
- Can change curve wear strips in minutes without opening the conveyor (S-Series)
- Can change wear strips without breaking chains
- Split head for easier internal access (M- and T-Series)
- Chains in UHMW wear strips and outside material path
- Paddles do not touch floors or walls for long life
- Direct drive with shaft-mounted gearboxes — no guards, less maintenance, and better safety
- Allows for multiple inlets and outlets
- Ships with chain preloaded for faster installation
