Features

Solutions range in size from one storage container (stationary or mobile) to multiple container units, to large storage buildings. We utilize our SMART Floors in all of these options.

- Simple, rugged construction
- Storage area can be divided
- Unit can be serviced without unloading
- Contents can be blended at discharge
- Existing buildings can be converted to a storage facility
- Trucks can be unloaded directly onto storage without additional equipment
- Material flow is first in, first out
- Overflow protection can be provided
- Material can be loaded with an end loader

Push-Pull Wedge Floor

- Simple, robust hydraulic system requires no sensors or limit switches
- Wedge pushes material out then reverses and slides back under pile
- Material shears off bottom of the pile
- Accurate discharge rates
